Alisa Shirkhanyan 2018

-Take a pencil and try to draw something. It seems you have a good perception of light and colors.

-Yes, but I have never drew anything, neither showed any talent at school...

-Just try it... you don't risk anything.

It was 1999 that my colleague Arguine believed in me and made me to discover a completely different world – the world of art and emotions. I discovered myself, I discovered another person sleeping deep inside of me for so many years.

Soon, instead of shopping in nice shops, I was choosing with enthusiasm different brushes, canvases, oil and sketchbox in small and crowded boutiques and enjoying trying different techniques of painting. Who could ever think of it a year ago! Nevertheless, after one year or so, the everyday routine and other problems did not leave any spare time and space for myself and I returned to my previous life where light and colors did not matter.

I can not recall exactly the moment that I felt the urge to paint again in 2015. I surprised myself by the joy and happiness of undusting my brushes. Now I am self-taught painter and never tried to take lessons from professional artists and get academic knowledge. I get inspiration from my dreams, my feelings and the nature where everything exists in harmony and love.
